

2025-2026 6.7L Cummins Oil Filter Cap

Covers installation of PN: WCF100843

1. Remove 6mm allen plug bleeder from top of OEM oil cap to allow oil to drain out of filter housing.

2. Use a 29mm socket/wrench to remove OEM oil cap.

3. Install and lubricate new o-ring with Lubegard Assemblee Goo or similar product and install new cap onto oil filter housing, torquing to 18FT-LB with ½" square drive.

4. Start the truck and inspect for any leaks around the new filter cap.
